CLINICAL STUDIES

587–593 Impact of musculoskeletal disease on quality of life in long-standing acromegaly
Anne Miller, Helen Doll, Joel David and John Wass

595–603 Somatostatinergic ligands in dopamine-sensitive and –resistant prolactinomas
Alessandra Fusco, Ginette Gunz, Philippe Jaquet, Henry Dufour, Anne Laure Germanetti, Michael D Culler, Anne Barlier and Alexandru Saveanu

605–613 Association between tumoral GH-releasing peptide receptor type 1a mRNA expression and in vivo response to GH releasing peptide-6 in ACTH-dependent Cushing’s syndrome patients
Marcio Carlos Machado, Sandra Valeria de Sa, Maria Lucia Correa-Gonçalves, Ricardo Rodrigues Grego, Maria Adélaide Albergaria Pereira, Valerio Angelo J Cesurin, Daniel Guerreiro-Neto and Luz Roberto Iglárdio

615–622 Indothelial nitric oxide synthase intron 460b polymorphism and early atherosclerotic changes in hypothyroidism GH-deficient adult patients
Fatma Jen, Manuela Demetrio, Nuno Ma Abue, Mir Ghaz, Haeril Oktar, AK Elliot, Farak Kafalber, Balim Ivar and Nihan Ece Gule

623–630 Evaluation of health-related quality of life in patients with Cushing’s syndrome with a new questionnaire

631–641 Impact of metformin versus repaglinide on non-glycaemic cardiovascular risk markers related to inflammation and endothelial dysfunction in non-obese patients with type 2 diabetes
Søren S Lund, Lise Sørum, Cem D A Stoffersen, Casper G Schalkwijk, Tom Tertlik, Jørgen Gram, R Pivonello, G Stalla, Hans-Henrik Parving and Allan A Vaag

643–653 Early or advanced stage type 2 diabetes is not accompanied by in vivo skeletal muscle mitochondrial dysfunction
H M De Feyter, N M A van den Broek, S F E Praet, K Nicolay, L J C van Loon and J J Prompers

655–660 Increased Nε-(carboxymethyl)-lysine levels in cerebral blood vessels of diabetic patients and in a (streptozotocin-treated) rat model of diabetes mellitus
A W van Deutekom, H W M Niessen, C G Schalkwijk, R J Heine and S Simsek

661–670 Variation in the home morphogenetic protein-2 gene affects on fat and lean body mass in young and elderly women
Fiona McGuigan, Emma Larzenius, Mattias Callreus, Paul Gerdhem, Holger Luthman and Kristina Åkesson

677–681 Sialochemical and oxidative analyses in radioactive I 131-treated patients with thyroid carcinoma
Sophia Ish-Shalom, Lena Durleshter, Elena Segal and Rafael M Nagler

691–698 The role of F-18-fluorodeoxyglucose positron emission tomography in the postoperative evaluation of differentiated thyroid cancer
Ali S Al-zahrani, Mohei-Eldin M Abouzied, Suzan Abdel Salam, Gamal Mohamed, Ayman Rifai, Abdulaziz Al Sugair and Tarik Amin

Significance of low levels of thyroglobulin in fine needle aspirates from cervical lymph nodes of patients with a history of differentiated thyroid cancer
Anne-Laure Colas, Robert Boizel, Patrick Faure, Geneviève Barbe, Jean Boutonnat, Nathalie Sturm, Daniel Seigneurin, Jean-Baptiste Cazeneuve, Philippe Chaffanjon and Olivier Chabre

An official journal of the European Society of Endocrinology

European Journal of Endocrinology
Volume 158, Number 5, May 2008
